Water A Matter Of Life

"Water -- A Matter of Life and Health" should be in the hands of everybody involved or at least interested in making life easier and more pleasurable. For that sake, one would hope for some benevolent donor or donors to fund translations into other languages, as well as to help lower the price or even get it distributed for free for the readership in the developing countries.

Water means the possibility of life. It is quite literally a matter of life and death, both for human and all other life on planet Earth. My aim in this paper is to consider water first as a religious symbol, but then also as something far more than that. My approach is based on a practical theology paradigm in which theory and praxis interact in...

Water is unique because the properties of water allow it to exist in all three states of matter! Water is usually a liquid, but when it reaches to 32° Fahrenheit (F), it freezes into ice. (Ice is the solid state of water.) When water reaches 212° F, it boils. When it begins to boil, some of the water turns into steam.

Water: The Molecule of Life. An Interview with Philip Ball. Water (Dihydrogen Oxide, H₂O) is a truly remarkable chemical compound and is fundamental to life on Earth. Credit: NASA. One of NASA 's guiding policies in the search for alien life is to " follow the water ." Water is fairly common in the universe, found everywhere from vast interstellar dust clouds to the orange-red fields of Mars, but most of this water is in the form of ice.
